Analysis of Categorical Data with R (Chapman & Hall/CRC Texts in Statistical Science) Christopher R. Bilder, Thomas M. Loughin

Learn How to Properly Analyze Categorical Data
Analysis of Categorical Data with R presents a modern account of categorical data analysis using the popular R software. It covers recent techniques of model building and assessment for binary, multicategory, and count response variables and discusses fundamentals, such as odds ratio and probability estimation. The authors give detailed advice and guidelines on which procedures to use and why to use them.

The Use of R as Both a Data Analysis Method and a Learning Tool
Requiring no prior experience with R, the text offers an introduction to the essential features and functions of R. It incorporates numerous examples from medicine, psychology, sports, ecology, and other areas, along with extensive R code and output. The authors use data simulation in R to help readers understand the underlying assumptions of a procedure and then to evaluate the procedure's performance. They also present many graphical demonstrations of the features and properties of various analysis methods.

Web Resource
The data sets and R programs from each example are available at www.chrisbilder.com/categorical. The programs include code used to create every plot and piece of output. Many of these programs contain code to demonstrate additional features or to perform more detailed analyses than what is in the text. Designed to be used in tandem with the book, the website also uniquely provides videos of the authors teaching a course on the subject. These videos include live, in-class recordings, which instructors may find useful in a blended or flipped classroom setting. The videos are also suitable as a substitute for a short course.

From reader reviews:

Aaron Williams:

This Analysis of Categorical Data with R (Chapman & Hall/CRC Texts in Statistical Science) book is simply not ordinary book, you have it then the world is in your hands. The benefit you will get by reading this book will be information inside this book incredible fresh, you will get info which is getting deeper you actually read a lot of information you will get. This specific Analysis of Categorical Data with R (Chapman & Hall/CRC Texts in Statistical Science) without we understand teach the one who reading through it become critical in contemplating and analyzing. Don't end up being worry Analysis of Categorical Data with R (Chapman & Hall/CRC Texts in Statistical Science) can bring any time you are and not make your case space or bookshelves' turn out to be full because you can have it in the lovely laptop even mobile phone. This Analysis of Categorical Data with R (Chapman & Hall/CRC Texts in Statistical Science) having fine arrangement in word and layout, so you will not really feel uninterested in reading.

Howard Joyce:

You may spend your free time to study this book this guide. This Analysis of Categorical Data with R (Chapman & Hall/CRC Texts in Statistical Science) is simple to develop you can read it in the recreation area, in the beach, train and soon. If you did not have got much space to bring the printed book, you can buy often the e-book. It is make you quicker to read it. You can save typically the book in your smart phone. So there are a lot of benefits that you will get when you buy this book.

Martin Duval:

Within this era which is the greater person or who has ability in doing something more are more precious than other. Do you want to become among it? It is just simple solution to have that. What you should do is just spending your time not much but quite enough to have a look at some books. On the list of books in the top list in your reading list is definitely Analysis of Categorical Data with R (Chapman & Hall/CRC Texts in Statistical Science). This book which is qualified as The Hungry Slopes can get you closer in becoming precious person. By looking upward and review this book you can get many advantages.

Laura Thibodeau:

As a university student exactly feel bored for you to reading. If their teacher questioned them to go to the library or make summary for some guide, they are complained. Just very little students that has reading's soul or real their pastime. They just do what the professor want, like asked to the library. They go to right now there but nothing reading really. Any students feel that examining is not important, boring and also can't see colorful pictures on there. Yeah, it is to become complicated. Book is very important to suit your needs. As we know that on this period, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. So , this Analysis of Categorical Data with R (Chapman & Hall/CRC Texts in Statistical Science) can make you experience more interested to read.
