CSI Research Survey 4: The Soviet Airborne Experience Part 2

Lieutenant Colonel David M. Glantz

CSI Research Survey 4: The Soviet Airborne Experience Part 2 Lieutenant Colonel David M. Glantz The Soviet Airborne Experience examines the experiences of the Red Army in World War II and traces Soviet airborne theory and practice both before and since the Great Patriotic War of 1941–45. Airborne warfare emerges as an essential part of the high-speed offensive operations planned by Soviet commanders.

Because Lieutenant Colonel Glantz examines airborne operations within the larger context of Soviet unconventional warfare, the implications of this study reach beyond one specialized form of maneuver. This study, in demonstrating the ability of Russian airborne and partisan forces to survive and fight behind German lines for months at a time, provides us with an instructive example of how Soviet special operations troops probably plan to operate in future wars. The Soviet Airborne Experience is an important reference for anyone concerned with planning and conducting operations.
