The Martian: A Novel by Andy Weir | Summary & Analysis

This is a Summary & Analysis. Lauded author Andy Weir's novel offers a gripping, inviting tale that partakes of young adult fiction and hard science fiction in a twist on the castaway rescue plot familiar from Defoe's Robinson Crusoe, Hanks's Castaway and many others. With its witty dialogue, exacting detail and not-too-improbable scenario, the book is an entertaining, engaging read likely to please not only the general public at which it is aimed, but also scholars of both young adult literature and science fiction and nascent scientists, who are inadequately represented in mainstream popular writing.

The novel straddles the generic lines of young adult and hard science fiction as it relates the story of Mark Watney's escape from being marooned on Mars. A member of the crew on the third living mission to Mars, Watney is struck in a storm when the mission formally aborts and must use his wits and the sharply limited physical resources available to him to make his way to a site from which he can be extracted. Meanwhile, on Earth, an international effort to rescue him is enacted—one which ultimately depends on Watney's erstwhile crewmates committing what amounts to mutiny. Its tight pace and eminently human characters make it likely that those who take up the text will see it through. Not much else can be asked of a book.

This companion also includes the following:

• Story Setting Analysis
• Story elements you may have missed as we decipher the novel
