# Safety Design for Space Operations: Chapter 3. Ground Safety: Special Topics

*Paul Kirkpatrick*

**Safety Design for Space Operations: Chapter 3. Ground Safety: Special Topics** Paul Kirkpatrick
This chapter is in two sections. The first section describes the typical hazards that may be encountered when processing payloads on the ground. Also described are some of the more common controls for these hazards. Many of these controls are based on hard requirements but they are also based on specific lessons learned. The second section covers gases storage and handling safety. First, for purposes of background, an overview of energy considerations of stored gases is given. The subsection that follows describes the hazards and corresponding causes associated with compressed gases. The remaining three subsections contain the operational controls that should be followed to minimize these risks.
