Neotropical Birds of Prey: Biology and Ecology of a Forest Raptor Community (Published in Association With the Peregrine Fund)

Until recently, surprisingly little has been known about the biology and behavior of tropical forest raptors, including such basic aspects as diets, breeding biology, habitat requirements, and population ecology, information critical to the development of conservation efforts. The Peregrine Fund conducted a significant eight-year-long research program on the raptor species, including owls, in Tikal National Park in Guatemala to learn more about Neotropical birds of prey. Impressive and unprecedented in scale, this pioneering research also involved the development of new methods for detecting, enumerating, and studying these magnificent but often elusive birds in their forest home. Beautifully illustrated with photographs of previously little-known species, the resulting book is the most important single source for information on the lowland tropical forest raptor species found in Central America.

Neotropical Birds of Prey covers twenty specific species in depth, including the Ornate Hawk-Eagle, the Barred Forest-Falcon, the Bat Falcon, and the Mexican Wood Owl, offering thorough synopses of all current knowledge regarding breeding biology and behavior, diet, habitat use, and spatial needs. Contributors to this landmark work also show how the populations fit together as a community with overlapping habitat and prey needs that can put them in competition with reptiles and mammalian carnivores as well, yet differ from one another in their nesting or feeding behaviors and population dynamics. The work's substantive original data offer interesting comparisons between tropical and temperate zone species, and provide a basis for establishing conservation measures based on firsthand research. Making available for the first time new data on the biology, ecology, behavior, and conservation of the majestic owls and raptors of the New World tropics, this book will appeal to a wide ornithological readership, especially the many raptor enthusiasts around the world.

From reader reviews:

Debra Jones:

The experience that you get from Neotropical Birds of Prey: Biology and Ecology of a Forest Raptor Community (Published in Association With the Peregrine Fund) could be the more deep you looking the information that hide in the words the more you get considering reading it. It doesn't mean that this book is hard to be aware of but Neotropical Birds of Prey: Biology and Ecology of a Forest Raptor Community (Published in Association With the Peregrine Fund) giving you excitement feeling of reading. The copy writer conveys their point in a number of way that can be understood by means of anyone who read it because the author of this reserve is well-known enough. This kind of book also makes your current vocabulary increase well. Therefore it is easy to understand then can go with you, both in printed or e-book style are available. We advise you for having this Neotropical Birds of Prey: Biology and Ecology of a Forest Raptor Community (Published in Association With the Peregrine Fund) instantly.

Judith Duncan:

Hey guys, do you would like to finds a new book to learn? May be the book with the name Neotropical Birds of Prey: Biology and Ecology of a Forest Raptor Community (Published in Association With the Peregrine Fund) suitable to you? The particular book was written by popular writer in this era. Typically the book untitled Neotropical Birds of Prey: Biology and Ecology of a Forest Raptor Community (Published in Association With the Peregrine Fund)is the one of several books which everyone read now. This specific book was inspired a number of people in the world. When you read this guide you will enter the new dimension that you ever know previous to. The author explained their thought in the simple way, and so all of people can easily to comprehend the core of this reserve. This book will give you a lots of information about this world now. So you can see the represented of the world in this book.

Augusta Wilson:

Reading a reserve tends to be new life style on this era globalization. With reading you can get a lot of information that can give you benefit in your life. Together with book everyone in this world may share their idea. Publications can also inspire a lot of people. Many author can inspire their particular reader with their story or their experience. Not only situation that share in the publications. But also they write about the data about something that you need case in point. How to get the good score toefl, or how to teach your young ones, there are many kinds of book that you can get now. The authors in this world always try to improve their skill in writing, they also doing some study before they write with their book. One of them is this Neotropical Birds of Prey: Biology and Ecology of a Forest Raptor Community (Published in Association With the Peregrine Fund).

James Waddell:

As a student exactly feel bored to reading. If their teacher inquired them to go to the library in order to make

summary for some publication, they are complained. Just very little students that has reading's heart and soul or real their leisure activity. They just do what the professor want, like asked to go to the library. They go to right now there but nothing reading seriously. Any students feel that looking at is not important, boring along with can't see colorful photos on there. Yeah, it is to be complicated. Book is very important for yourself. As we know that on this period of time, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. Therefore , this Neotropical Birds of Prey: Biology and Ecology of a Forest Raptor Community (Published in Association With the Peregrine Fund) can make you truly feel more interested to read.
