# Nonparametric Statistical Inference, Fifth Edition (Statistics: Textbooks & Monographs)

*Jean Dickinson Gibbons, Subhabrata Chakraborti*

**Nonparametric Statistical Inference, Fifth Edition (Statistics: Textbooks & Monographs)** Jean Dickinson Gibbons, Subhabrata Chakraborti

*Proven Material for a Course on the Introduction to the Theory and/or on the Applications of Classical Nonparametric Methods*

Since its first publication in 1971, **Nonparametric Statistical Inference** has been widely regarded as *the* source for learning about nonparametric statistics. The fifth edition carries on this tradition while thoroughly revising at least 50 percent of the material.

**New to the Fifth Edition**

- Updated and revised contents based on recent journal articles in the literature
- A new section in the chapter on goodness-of-fit tests
- A new chapter that offers practical guidance on how to choose among the various nonparametric procedures covered
- Additional problems and examples
- Improved computer figures

This classic, best-selling statistics book continues to cover the most commonly used nonparametric procedures. The authors carefully state the assumptions, develop the theory behind the procedures, and illustrate the techniques using realistic research examples from the social, behavioral, and life sciences. For most procedures, they present the tests of hypotheses, confidence interval estimation, sample size determination, power, and comparisons of other relevant procedures. The text also gives examples of computer applications based on Minitab, SAS, and StatXact and compares these examples with corresponding hand calculations. The appendix includes a collection of tables required for solving the data-oriented problems.

**Nonparametric Statistical Inference, Fifth Edition** provides in-depth yet accessible coverage of the theory and methods of nonparametric statistical inference procedures. It takes a practical approach that draws on scores of examples and problems and minimizes the theorem-proof format.

Jean Dickinson Gibbons was recently interviewed regarding her generous pledge to Virginia Tech.

**From reader reviews:**

**Christina Bain:**

Information is provisions for anyone to get better life, information today can get by anyone in everywhere. The information can be a knowledge or any news even restricted. What people must be consider any time those information which is from the former life are challenging to be find than now is taking seriously which one would work to believe or which one often the resource are convinced. If you get the unstable resource then you understand it as your main information you will have huge disadvantage for you. All of those possibilities will not happen in you if you take Nonparametric Statistical Inference, Fifth Edition (Statistics: Textbooks & Monographs) as the daily resource information.

**William Rice:**

The book untitled Nonparametric Statistical Inference, Fifth Edition (Statistics: Textbooks & Monographs) is the book that recommended to you you just read. You can see the quality of the reserve content that will be shown to you. The language that publisher use to explained their ideas are easily to understand. The writer was did a lot of exploration when write the book, therefore the information that they share for you is absolutely accurate. You also will get the e-book of Nonparametric Statistical Inference, Fifth Edition (Statistics: Textbooks & Monographs) from the publisher to make you much more enjoy free time.

**Amy Nichols:**

In this period globalization it is important to someone to obtain information. The information will make professionals understand the condition of the world. The condition of the world makes the information easier to share. You can find a lot of referrals to get information example: internet, magazine, book, and soon. You can observe that now, a lot of publisher in which print many kinds of book. The book that recommended to you is Nonparametric Statistical Inference, Fifth Edition (Statistics: Textbooks & Monographs) this reserve consist a lot of the information of the condition of this world now. That book was represented how does the world has grown up. The words styles that writer use to explain it is easy to understand. The writer made some research when he makes this book. Honestly, that is why this book acceptable all of you.

**Juana Houck:**

Book is one of source of know-how. We can add our expertise from it. Not only for students and also native or citizen have to have book to know the upgrade information of year to year. As we know those ebooks have many advantages. Beside we add our knowledge, also can bring us to around the world. With the book Nonparametric Statistical Inference, Fifth Edition (Statistics: Textbooks & Monographs) we can take more advantage. Don't someone to be creative people? To be creative person must love to read a book. Merely choose the best book that appropriate with your aim. Don't become doubt to change your life by this book Nonparametric Statistical Inference, Fifth Edition (Statistics: Textbooks & Monographs). You can more pleasing than now.
